

Interview guide

Introduction and Background

We are students from Chalmers and Göteborg University working on our Master's thesis with Ericsson. The goal of our research is to look into the communication patterns inside the large-scale organization using SCRUM and identify problematic areas that might be hindering the possibility of reaping the benefits of agile adoption. As a part of this work we are conducting interviews with several employees to get the perspective of those actually involved in the various aspects of the development process and create a broad picture of existing context. We will interview representatives of various roles within the organization and thus aim to cover as more aspects of the existing environment as possible.

The purpose of this interview is to gain more insight on the current situation from you as a [ROLE] and possibly discover any discrepancies or obstacles of the communication flow. Your response will be treated anonymously in any publications (internal or external) of this study. We will start the interview with a set of questions regarding your background in the organization and continue on with more open-ended questions related to the transformation of the development process in Ericsson and sequentially arising issues related to the organizational structure and information flow inside it.

The interview will take around [NNN] minutes.
