Approving of the thesis subject by the master coordinator

The thesis subject has to be accepted, not only by the examiner, but also by the master thesis coordinator or someone that he has appointed. This is done a bit different on different master programs but *if the thesis registration is handled by the master thesis coordinator*, then by the time it (and this form) reaches an examiner the thesis has been approved in the proper way.

Therefore **the registration form should be sent to the master thesis coordinator regardless of if the student talks to an examiner him/herself or not**.
